## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 31-56 and 58-60 are rejected under 35 U.S.C. 102(b) as being anticipated by Nicholson (6,131,915).

Nicholson discloses a gasket assembly comprising at least one rigid carrier 6 (or 8) and a planar shim 10 or see col. 5, line 44. The carrier and shim have a gasket opening 4. The carrier has an inner flexible sealing portion 14 adjacent to and defining the opening. The inner sealing portion is longitudinally offset relative to the carrier. The carrier has a flexible stopper portion 12, 110a or 110c that limits the amount of compression of the inner portion and is less flexible than the inner portion (see 4:58-67, 5:19-24; and 5:1-5, which says shape can be changed to V or arcuate to create some flexibility but still limit compression). The stopper is spaced from the opening but is still in close proximity to the inner portion and around the same opening (see Fig. 12). Rubber coatings can be applied various surfaces of the gasket (5:58-63). Regarding claim 47, screen-printing is a process step in a product claim and is give little patentable weight. Regarding claims 48-55, these claims are considered intended use. The gasket is capable of being used in these environments.

***Allowable Subject Matter***

3. Claim 57 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 1-30 are allowed.

***Response to Arguments***

5. Applicant's arguments with respect to claims 31-60 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
